Detailed Action

The indicated allowability of claims 14-15, 20-22 is withdrawn in view of the newly discovered reference(s) to US Patent 5,523,389. Rejections based on the newly cited reference(s) follow.

Obviousness Type Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 14-15 and 20-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,523,389. Although the conflicting claims are not identical, they are not patentably distinct from each other because instant claims 14-15 and 21-22 are generic to what is claimed in claim 1 of the '389 patent. That is claim 1 of the '389 patent falls entirely within the scope of instant claims 14-15 and 21-22, or in other words, claims 14-15 and 21-22 are anticipated by claim 1 of the '389 patent. Specifically, the modified phosphorothioate oligonucleotide TTGGGGTT recited in claim 1 of the '389 patent is a

Art Unit: 1636

chemically modified oligonucleotide having no more than about 27 bases wherein said oligonucleotide has the structure of $(N_xG_4)_Q N_x$ where X is 2 and Q is 1 or $(N_xG_4N_y)_Q$ wherein X and Y are 2 and Q is 1. With regard to the ability of the TTGGGGTT oligonucleotide to modulate telomere length, the instant specification specifically lists this oligonucleotide (in Table 1) as one which is expected to result in modulation of telomere length when administered to cells.

Claims 14-15 and 20-22 are directed to an invention not patentably distinct from claim 1 of commonly assigned 5,523,389. Specifically, the claims are not patentably distinct for the reasons cited in the above obviousness type double patenting rejection.

The U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302). Commonly assigned US 5,523,389, discussed above, would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) if the commonly assigned case qualifies as prior art under 35 U.S.C. 102(e), (f) or (g) and the conflicting inventions were not commonly owned at the time the invention in this application was made. In order for the examiner to resolve this issue, the assignee can, under 35 U.S.C. 103(c) and 37 CFR 1.78(c), either show that the conflicting inventions were commonly owned at the time the invention in this application was made, or name the prior inventor of the conflicting subject matter.

A showing that the inventions were commonly owned at the time the invention in this application was made will preclude a rejection under 35 U.S.C. 103(a) based upon

Art Unit: 1636

the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications filed on or after November 29, 1999.

Claims 8-10 are allowed.

Claims 16-19 and 23-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
